

# TRAINING OF TRAINERS: OVERDOSE PREVENTION/NALOXONE

## Why should you get trained?

In 2012, Lake county endured 80+ fatal opioid overdoses while Cook county saw an astonishing 533. Since that time, rates have dipped slightly telling us that overdose prevention education works. Aside from learning how to save a life from opioid overdose, trainers will leave with the knowledge necessary to train other community members, clients and their families to use naloxone, the opiate overdose antidote.

## What will you learn?

- How our brains are wired for addiction
- How opiates work in the brain & body
- How to recognize signs of overdose
- How to administer Naloxone

## What will you leave with?

- Naloxone kits
- Access to the training presentation
- A trainer's guide
- The training video: LIVE!

Sat, October 25 | 9-2 pm  
College of Lake County  
19351 W. Washington St.  
Auditorium Room C005  
Grayslake, IL 60030
